# Relevance

Today, within the cryptocurrency world, there are a huge number of different popular projects whose main basis and support is their team, the website and mostly the belief of the people themselves in this project.

Our team solves an important problem concerning the fundamental basis within which the project will be connected to the real economy in the form of a functioning business with a widely developed digital ecosystem.

In today's realities of the crypto world, this sphere is just beginning its development path and we are among the first who plan to bring it to life.

# Mission and purpose

- The goal of the project is to create an international network under a united brand.
- The mission of the project is to provide customers around the world with a huge range of different types of goods and services.

# Products

Ruwall is an international wholesale trade center which gives you an opportunity to make deals for buying and selling goods and services, advertise products in a large number of different cities around the world with a flexible policy in terms of pricing.

Through a comprehensive analysis of the market and existing competitors, we were able to piece together the most advanced technology and features, which formed the basis of the formation of this marketplace. Over time, all of its components will gradually modernize and acquire a new look to meet all the needs of our customers.

Thanks to the professionalism and expertise of our talented team, a core range of products such as:

# Ruwall Marketplace

**Ruwall is a huge network of online shopping malls franchises, which have no analogues, all over the world. With this business in the real sector of economy we provide our customers with the opportunity to engage in commercial trade of goods, services within the international community.**

**The striking difference between us and our competitors is that our shopping malls cover a huge range of destinations in different cities with flexible pricing policy. A prerequisite for full work as a seller is to rent an online store in our shopping malls.**

**Anyone has the opportunity and full rights to buy a franchise of this marketplace in their country. To do this you can go to the official website and read the section for franchisees, or if difficulties arise, contact technical support. You will be given to see a number of conditions that must be fulfilled in order to formalize it.**

**For more information, go to <https://ruwall.org/>.**

# Ruwall Pay

Considering the fact that our team strives to provide our clients with the best range of services, it was decided to create our own product in the form of electronic payment system, which in its turn will be an important part of Ruwall holding ecosystem.

Using it, you have an opportunity to buy and pay for goods, various services and other things on the site without any difficulties.

# Ruwall Technopark

The main and, perhaps, the most ambitious task our team has defined is the construction of our own technology park called Ruwall. This will be a scientific and technological complex, covering all processes from basic scientific research, pilot production, all the way to the realization of new products.

Simply put, it will be a territorial, scientific, technological and technical base for the implementation of innovative projects.

It will include industry facilities, business centers, exhibition areas, educational institutions, as well as service facilities: means of transport, access roads, residential settlements, security.

Competitions and tournaments will be held for people who promote their projects, with a clearly defined prize fund for the further realization of their startup.

# Ruwall Factoring

We always take care of our clients and for their own convenience and confidence in transactions, our team decided to provide through the marketplace such a service as factoring. Factoring is a financial service for companies working on deferred payment terms. With its help, the seller receives money for the goods immediately after shipment, can eliminate cash gaps and replenish working capital.

The service works like this:

1. You supply goods, perform work or provide services to a customer.
  2. You then contact Ruwall to transfer to them the right to claim the debt from the customer. The factor becomes your customer's creditor.
  3. The factor asks your customer for confirmation that they have fulfilled their obligation under the contract: delivered the goods or rendered the service.
  4. You receive money from the factor.
  5. The client pays the factor.
  6. You pay the commission to the factor.
- Everything is very simple and convenient.

# Ruwall Leasing

The topic of leasing today is very relevant and is very popular among people. That's why Ruwall decided to introduce this opportunity into its ecosystem.

Leasing is a type of financial services, a form of crediting in which every person can rent a car, equipment, other vehicles, production facilities and others on a long-term basis with the possibility of their subsequent redemption at the residual value.

This service is suitable for both individual entrepreneurs and legal entities that need special equipment, vehicles, real estate or business equipment.

# Ruwall Coin

WETC is a proprietary decentralized currency, an investment product of an international holding company, based on the TRON blockchain.

Its main purpose is to form the basis for the formation of a further range of services and goods, as well as for optimization within the use of the Ruwall ecosystem.

# Uniqueness

The main peculiarity of Ruwall Coin is the fact that it is a fundamental basis within the existing business, which in turn operates in the real sector of the economy.

It is a product that serves as full-fledged transparency of trade relations between the participants and, as a consequence, leads to an increase in trust between them with guaranteed collateral.

# Key features

**International network of franchisees around the world**  
**There are currently over 120 countries**

**Official public company**  
**Wide-ranging network in various service areas.**

**Real sector of the economy with a clean legal basis**  
**A functioning business with live financial turnover.**

**Digital project**  
**Unparalleled with rapid scalability in any country**

# Ecosystem

**Ruwall Leasing**  
Stacking

**Ruwall Pay**

**Ruwall.com**

**Ruwall Technopark**

**Ruwall Factoring**  
Stacking

# Technical part

With its TRON blockchain backbone, WETC has the most advanced technology:

High-speed transactions due to DPOS consensus scalability

The versatility of the TRC-20 standard ensures low intra-network fees

Decentralized, open-source ecosystem.

# Emission

Smart contract has a total issue of 5,000,000,000.

Total - 100% - 5 000 000 000

1.Team + Advisors + Founders - 51.00%.

2.Community - 25.00 %.

3.Reserve - 10.00 %

4.Liquidity on DEX - 5.00%

5.Staking Pool - 5.00 %

# Listing on the exchange

At the moment our company is negotiating with several popular exchanges to place our asset. In the future, the team plans to enter a number of other large capitalization exchanges for the purpose of convenience and to meet the needs and desires of our clients.

# Legal regulations

Ruwall intends to conduct its business in full compliance with applicable laws and regulations and with the ability to obtain the necessary licenses and permits, if required.

Regulatory licenses and/or permits are likely to be required in a number of relevant jurisdictions in which activities may be conducted. This means that the development and implementation of all of the initiatives described in this white paper is not guaranteed. As a result, the initiatives described herein may not be available in certain markets or may be prohibited altogether.

For the time being, however, our company operates in the Austrian jurisdiction in compliance with all laws.

This may require a restructuring of the entire Coin ecosystem and/or outright unavailability of the desired changes in all or some aspects. In addition, it is expected that the development of any initiatives will be done in stages. At certain stages of development, the project may rely on relationships with certain licensed third parties. If these entities are no longer properly licensed in the relevant jurisdiction, Sendde's ability to further develop in that country will be affected.

# Without obligations

To the maximum extent permitted by applicable laws, rules and regulations, Ruwall Coin shall not be liable for any indirect, special, incidental, consequential or other damages of any kind, whether arising in tort, contract or otherwise (including but not limited to loss of revenue, profits and loss of use of data), resulting from or in connection with any acceptance of or reliance on this white paper or any part thereof by users.

You may not transfer this technical document to any jurisdiction where this technical document is restricted or prohibited for use.

# Reliability of information

No representation or warranty has been made to the recipient of this technical document or its advisors as to the accuracy or completeness of the information, statements, opinions or matters (express or implied) arising out of or derived from this technical document or any omission in this document or any other written or oral information or opinions provided now or in the future by any interested party or their advisors.

The Ruwall Coins presented in this white paper are under development and are continually being updated, including, but not limited to, key management features and specifications. If and when Ruwall Coin Coins are finalized, they may differ materially from the description provided herein.

No representation or warranty is made as to the achievement or reasonableness of any plans, future projections or prospects, and nothing in this document is or should be construed as a promise or representation regarding the future. Nevertheless, our team will use its best efforts to achieve all of its objectives.

# Risk warning

Buying Ruwall Coin involves substantial risk and may result in the loss of some or all of your money. Before purchasing WETC coins, risks should be carefully evaluated and taken into account, including those listed in any other documents.

Buyers should only purchase Ruwall Coin if they fully understand the nature of Ruwall Coin and accept the risks inherent in Ruwall Coin.

Crypto coins may be susceptible to: expropriation and/or theft; hackers or other malicious groups or organizations may attempt to interfere with our system/network in various ways, including malware attacks, denial of service attacks, consensus attacks, Sybil attacks, smurfing and spoofing, which could result in the loss of your crypto coins or loss of your ability to access or control your crypto coins.

Because of this, our team will work on fund storage security to prevent unwanted impacts.

# Security

Prospective buyers should independently assess the nature of the risks involved and their propensity to take them, and consult with their advisors before making any decisions.

# Thank you for your attention

## Ruwall (WETC) Coin

Name: Ruwall Coin

Ticker: WETC
